Mr. Tom Tetting
Engineering Geologist
State of Utah
4241 State Office Building
Salt Lake City, UT 84114

Dear Tom:

RE: South Lisbon
Act/037/018
San Jaun Co., Utah

The area south and northwest of the SL-1 pit was redone on August 17, 1983. MRC felt that the afternoon rainshowers occurring on a regular schedule would benefit the seed at an early stage and thus, we did this work now instead of waiting a month or so.

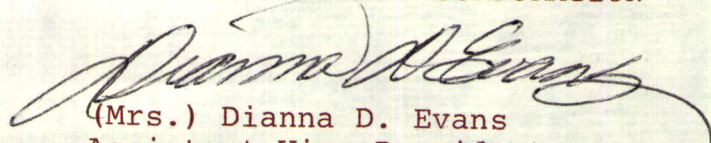

The seed mixture used:

Russian Wildrye	31b/acre
Crested Wheatgrass	41b/acre
Intermitant Wheatgrass	41b/acre
Four Wing Saltbrush	11b/acre
Yellow Sweetclover	11b/acre
Indian Ricegrass	11b/acre

A D-6 cat was used to walk over the area so the seed would penetrate the soil and hopefully not be damaged by wind.

MRC will monitor this area closely to assure revegetation, however, no sign of growth is expected until spring of 1984.

Sincerely yours,
MINERALS RECOVERY CORPORATION

(Mrs.) Dianna D. Evans
Assistant Vice President
